Background

Product Name: TriMethyl-Histone H3 (Lys79) (9G4)
Mouse Monoclonal Antibody
Catalog #: AMM03713

H3 Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability.

Research Area

Epigenetics and Nuclear Signaling
