## Background

**Product Name: IL-18 Rabbit Monoclonal Antibody**  
**Catalog #: AMRe02151**

The protein encoded by this gene is a proinflammatory cytokine that augments natural killer cell activity in spleen cells, and stimulates interferon gamma production in T-helper type I cells. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

## Research Area

Immunology

## Image Data

Western blot analysis of IL-18 in HeLa lysates using IL-18 antibody.

Immunohistochemistry analysis of paraffin-embedded Human colon cancer using IL-18 antibody. High-pressure and temperature Sodium Citrate pH 6.0 was used for antigen retrieval.
