Background

Transcriptional modulator activated by BMP (bone morphogenetic proteins) type 1 receptor kinase. Smad5 is a receptorregulated Smad (R-Smad). Smad5 is required for normal development of the cardiovascular system in vivo; lack of the Smad5 gene results in apoptosis of cardiac myocytes. 3 Upregulation of Smad5 has been reported to mediate apoptosis of gastric epithelial cells induced by Helicobacter pylori infection. Tissue specificity: Ubiquitous.

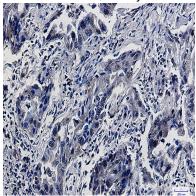

Research Area

Signal Transduction

Image Data

Western blot analysis of Smad5 in C6, Hela lysates using Smad5 antibody.

Immunohistochemistry analysis of paraffin-embedded Human lung cancer using SMAD5 antibody.High-pressure and temperature Sodium Citrate pH 6.0 was used for antigen retrieval.
