Product Name: ATP5G1 (7N16) Rabbit Monoclonal Antibody
Catalog #: AMRe07329

Summary

Production Name	ATP5G1 (7N16) Rabbit Monoclonal Antibody
Description	Rabbit Monoclonal Antibody
Host	Rabbit
Application	WB
Reactivity	Human,Mouse,Rat

Performance

Conjugation	Unconjugated
Modification	Unmodified
Isotype	IgG
Clonality	Monoclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
Buffer	Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% New type preservative N and 0.05% BSA.
Purification	Affinity purification

Immunogen

Gene Name	ATP5MC1
Alternative Names	ATP5G1; ATP5G2; ATP5G3;
Gene ID	516.0
SwissProt ID	P05496.A synthetic peptide of human ATP synthase C

Application

Dilution Ratio	WB 1:500-1:2000
Molecular Weight	14kDa

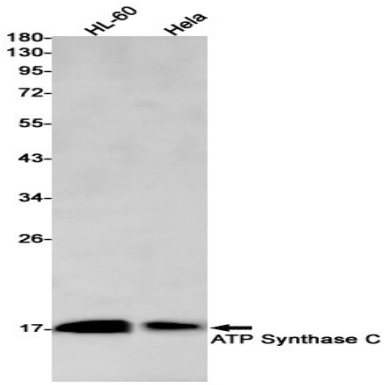
Background

Product Name: ATP5G1 (7N16) Rabbit Monoclonal Antibody
Catalog #: AMRe07329

Mitochondrial membrane ATP synthase (F(1)F(0) ATP synthase or Complex V) produces ATP from ADP in the presence of a proton gradient across the membrane which is generated by electron transport complexes of the respiratory chain. Mitochondrial membrane ATP synthase (F(1)F(0) ATP synthase or Complex V) produces ATP from ADP in the presence of a proton gradient across the membrane which is generated by electron transport complexes of the respiratory chain. F-type ATPases consist of two structural domains, F(1) - containing the extramembraneous catalytic core and F(0) - containing the membrane proton channel, linked together by a central stalk and a peripheral stalk. During catalysis, ATP synthesis in the catalytic domain of F(1) is coupled via a rotary mechanism of the central stalk subunits to proton translocation. Part of the complex F(0) domain. A homomeric c-ring of probably 10 subunits is part of the complex rotary element.

Research Area

Image Data



Western blot detection of ATP Synthase C in HL-60,Hela cell lysates using ATP Synthase C antibody(1:1000 diluted).
