

**Product Name: GABA B Receptor 1 (17L17) Rabbit  
Monoclonal Antibody  
Catalog #: AMRe11228**

## Summary

<b>Production Name</b>	GABA B Receptor 1 (17L17) Rabbit Monoclonal Antibody
<b>Description</b>	Rabbit Monoclonal Antibody
<b>Host</b>	Rabbit
<b>Application</b>	WB,ELISA
<b>Reactivity</b>	Human,Mouse,Rat

## Performance

<b>Conjugation</b>	Unconjugated
<b>Modification</b>	Unmodified
<b>Isotype</b>	IgG
<b>Clonality</b>	Monoclonal
<b>Form</b>	Liquid
<b>Storage</b>	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
<b>Buffer</b>	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% New type preservative N and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.
<b>Purification</b>	Affinity purification

## Immunogen

<b>Gene Name</b>	GABBR1
<b>Alternative Names</b>	GABA-B receptor 1; GABA-B-R1; GABAB R1; GABAB subunit 1c; GABABR1; GABBR1 3; Gamma aminobutyric acid (GABA) B receptor 1; Gb1; GPRC3A;
<b>Gene ID</b>	2550.0
<b>SwissProt ID</b>	Q9UBS5.

## Application

<b>Dilution Ratio</b>	WB 1:500-1:2000
<b>Molecular Weight</b>	108kDa

**Product Name: GABA B Receptor 1 (17L17) Rabbit  
Monoclonal Antibody  
Catalog #: AMRe11228**

## Background

Receptor for GABA. The activity of this receptor is mediated by G-proteins that inhibit adenylyl cyclase activity, stimulates phospholipase A2, activates potassium channels, inactivates voltage-dependent calcium-channels and modulates inositol phospholipids hydrolysis. Plays a critical role in the fine-tuning of inhibitory synaptic transmission. Component of a heterodimeric G-protein coupled receptor for GABA, formed by GABBR1 and GABBR2 (PubMed: [9872316](http://www.uniprot.org/citations/9872316), PubMed: [9872744](http://www.uniprot.org/citations/9872744), PubMed: [15617512](http://www.uniprot.org/citations/15617512), PubMed: [18165688](http://www.uniprot.org/citations/18165688), PubMed: [22660477](http://www.uniprot.org/citations/22660477), PubMed: [24305054](http://www.uniprot.org/citations/24305054)). Within the heterodimeric GABA receptor, only GABBR1 seems to bind agonists, while GABBR2 mediates coupling to G proteins (PubMed: [18165688](http://www.uniprot.org/citations/18165688)). Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of downstream effectors, such as adenylate cyclase (PubMed: [10906333](http://www.uniprot.org/citations/10906333), PubMed: [10773016](http://www.uniprot.org/citations/10773016), PubMed: [10075644](http://www.uniprot.org/citations/10075644), PubMed: [9872744](http://www.uniprot.org/citations/9872744), PubMed: [24305054](http://www.uniprot.org/citations/24305054)). Signaling inhibits adenylate cyclase, stimulates phospholipase A2, activates potassium channels, inactivates voltage-dependent calcium-channels and modulates inositol phospholipid hydrolysis (PubMed: [10075644](http://www.uniprot.org/citations/10075644)). Calcium is required for high affinity binding to GABA (By similarity). Plays a critical role in the fine-tuning of inhibitory synaptic transmission (PubMed: [9844003](http://www.uniprot.org/citations/9844003)). Pre-synaptic GABA receptor inhibits neurotransmitter release by down-regulating high-voltage activated calcium channels, whereas postsynaptic GABA receptor decreases neuronal excitability by activating a prominent inwardly rectifying potassium (Kir) conductance that underlies the late inhibitory postsynaptic potentials (PubMed: [9844003](http://www.uniprot.org/citations/9844003), PubMed: [9872316](http://www.uniprot.org/citations/9872316), PubMed: [10075644](http://www.uniprot.org/citations/10075644), PubMed: [9872744](http://www.uniprot.org/citations/9872744), PubMed: [22660477](http://www.uniprot.org/citations/22660477)). Not only implicated in synaptic inhibition but also in hippocampal long-term potentiation, slow wave sleep, muscle relaxation and antinociception (Probable). Activated by (-)-baclofen, cgp27492 and blocked by phaclofen (PubMed: [9844003](http://www.uniprot.org/citations/9844003),

**Product Name: GABA B Receptor 1 (17L17) Rabbit  
Monoclonal Antibody

## Research Area

## Image Data

Western blot analysis of GABA B Receptor 1 expression in HeLa cell lysate.

## Note

For research use only.
