

**Product Name: SH-PTP1 (phospho Tyr564) Rabbit Polyclonal Antibody**  
**Catalog #: APRab05426**

---

## Summary

<b>Production Name</b>	SH-PTP1 (phospho Tyr564) Rabbit Polyclonal Antibody
<b>Description</b>	Rabbit Polyclonal Antibody
<b>Host</b>	Rabbit
<b>Application</b>	WB,ELISA
<b>Reactivity</b>	Human,Monkey

## Performance

<b>Conjugation</b>	Unconjugated
<b>Modification</b>	Phospho Antibody
<b>Isotype</b>	IgG
<b>Clonality</b>	Polyclonal
<b>Form</b>	Liquid
<b>Storage</b>	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
<b>Buffer</b>	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.
<b>Purification</b>	Affinity purification

## Immunogen

<b>Gene Name</b>	PTPN6 PTPN6; HCP; PTP1C; Tyrosine-protein phosphatase non-receptor type 6;
<b>Alternative Names</b>	Hematopoietic cell protein-tyrosine phosphatase; Protein-tyrosine phosphatase 1C; PTP-1C; Protein-tyrosine phosphatase SHP-1; SH-PTP1
<b>Gene ID</b>	5777.0
<b>SwissProt ID</b>	P29350.The antiserum was produced against synthesized peptide derived from human SHP-1 around the phosphorylation site of Tyr564. AA range:530-579

## Application

<b>Dilution Ratio</b>	WB 1:500-1:2000; ELISA 2000-20000
<b>Molecular Weight</b>	70kD

---

**Product Name: SH-PTP1 (phospho Tyr564) Rabbit Polyclonal Antibody**  
**Catalog #: APRab05426**

---

## Background

The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. N-terminal part of this PTP contains two tandem Src homolog (SH2) domains, which act as protein phospho-tyrosine binding domains, and mediate the interaction of this PTP with its substrates. This PTP is expressed primarily in hematopoietic cells, and functions as an important regulator of multiple signaling pathways in hematopoietic cells. This PTP has been shown to interact with, and dephosphorylate a wide spectrum of phospho-proteins involved in hematopoietic cell signaling. Multiple alternatively spliced variants of this gene, which encode distinct isoforms, have been reported. [provided by RefSeq, Julcatalytic activity:Protein tyrosine phosphate + H(2)O = protein tyrosine + phosphate.,function:Plays a key role in hematopoiesis. This PTPase activity may directly link growth factor receptors and other signaling proteins through protein-tyrosine phosphorylation. The SH2 regions may interact with other cellular components to modulate its own phosphatase activity against interacting substrates. Together with MTUS1, induces UBE2V2 expression upon angiotensin II stimulation.,PTM:Phosphorylated on serine and tyrosine residues.,similarity:Belongs to the protein-tyrosine phosphatase family. Non-receptor class 2 subfamily.,similarity:Contains 1 tyrosine-protein phosphatase domain.,similarity:Contains 2 SH2 domains.,subcellular location:In neurons, translocates into the nucleus after treatment with angiotensin II.,subunit:Monomer. Interacts with MTUS1 (By similarity). Binds PTPNS1, LILRB1 and LILRB2. Interacts with FCRL2, FCRL3, FCRL4, CD300LF and CD84.,tissue specificity:Isoform 1 is expressed in hematopoietic cells while isoform 2 is expressed in non-hematopoietic cells.,

## Research Area

B\_Cell\_Antigen; Adherens\_Junction; T\_Cell\_Receptor; MAPK; Protein\_Acetylation

## Image Data

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-

**Product Name: SH-PTP1 (phospho Tyr564) Rabbit Polyclonal Antibody**  
**Catalog #: APRab05426**

Phosphopeptide (Phospho-right) , using SHP-1 (Phospho-Tyr564) Antibody

Western blot analysis of lysates from COS7 cells treated with EGF 200ng/ml 30 ', using SHP-1 (Phospho-Tyr564) Antibody. The lane on the right is blocked with the phospho peptide.
