Product Name: Tie-2 (phospho Tyr1102) Rabbit

Polyclonal Antibody Catalog #: APRab05556

## **Summary**

Production Name Tie-2 (phospho Tyr1102) Rabbit Polyclonal Antibody

**Description** Rabbit Polyclonal Antibody

HostRabbitApplicationIHC,ELISAReactivityHuman,Mouse

#### **Performance**

**Conjugation** Unconjugated

**Modification** Phospho Antibody

**Isotype** IgG

Clonality Polyclonal Form Liquid

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw Storage

cycles.

**Buffer** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.

**Purification** Affinity purification

## **Immunogen**

Gene Name TEK

TEK; TIE2; VMCM; VMCM1; Angiopoietin-1 receptor; Endothelial tyrosine kinase; Tunica

Alternative Names interna endothelial cell kinase; Tyrosine kinase with Ig and EGF homology domains-2;

Tyrosine-protein kinase receptor TEK; Tyrosine-protein kinase receptor

**Gene ID** 7010.0

Q02763. The antiserum was produced against synthesized peptide derived from human

TIE2 around the phosphorylation site of Tyr1102. AA range:1068-1117

# **Application**

SwissProt ID

**Dilution Ratio** IHC 1:100 - 1:300. ELISA: 1:40000...

Product Name: Tie-2 (phospho Tyr1102) Rabbit

Polyclonal Antibody Catalog #: APRab05556

#### **Molecular Weight**

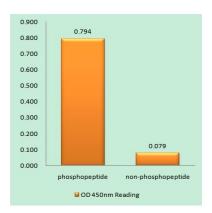

## **Background**

This gene encodes a receptor that belongs to the protein tyrosine kinase Tie2 family. The encoded protein possesses a unique extracellular region that contains two immunoglobulin-like domains, three epidermal growth factor (EGF)-like domains and three fibronectin type III repeats. The ligand angiopoietin-1 binds to this receptor and mediates a signaling pathway that functions in embryonic vascular development. Mutations in this gene are associated with inherited venous malformations of the skin and mucous membranes. Alternative splicing results in multiple transcript variants. Additional alternatively spliced transcript variants of this gene have been described, but their full-length nature is not known. [provided by RefSeq, Feb 2014],catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine phosphate., disease: Defects in TEK are a cause of dominantly inherited venous malformations (VMCM) [MIM:600195]; an error of vascular morphogenesis characterized by dilated, serpiginous channels., function: This protein is a protein tyrosinekinase transmembrane receptor for angiopoietin 1. It may constitute the earliest mammalian endothelial cell lineage marker. Probably regulates endothelial cell proliferation, differentiation and guides the proper patterning of endothelial cells during blood vessel formation, similarity: Belongs to the protein kinase superfamily. Tyr protein kinase family., similarity: Belongs to the protein kinase superfamily. Tyr protein kinase family. Tie subfamily., similarity: Contains 1 protein kinase domain, similarity: Contains 2 Iq-like C2-type (immunoglobulin-like) domains, similarity: Contains 3 EGF-like domains., similarity: Contains 3 fibronectin type-III domains., tissue specificity: Predominantly expressed in endothelial cells and their progenitors, the angioblasts. Has been directly found in placenta and lung, with a lower level in umbilical vein endothelial cells, brain and kidney.,

#### Research Area

Angiogenesis

## **Image Data**

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-
