Product Name: Unc18-1 (phospho Ser313) Rabbit

Polyclonal Antibody Catalog #: APRab05606

Summary

Production Name Unc18-1 (phospho Ser313) Rabbit Polyclonal Antibody

Description Rabbit Polyclonal Antibody

Host Rabbit
Application WB

Reactivity Human, Mouse, Rat, Monkey

Performance

Conjugation	Unconjugated
Modification	Phospho Antibody
Isotype	IgG
Clonality	Polyclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
Buffer	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.
Purification	Affinity purification

Immunogen

Gene Name STXBP1

STXBP1; UNC18A; Syntaxin-binding protein 1; MUNC18-1; N-Sec1; Protein unc-18 Alternative Names

homolog 1; Unc18-1; Protein unc-18 homolog A; Unc-18A; p67

Gene ID 6812.0

P61764. The antiserum was produced against synthesized peptide derived from human

MUNC-18a around the phosphorylation site of Ser313. AA range:279-328

Application

SwissProt ID

Dilution Ratio WB 1:500-1:2000. ELISA: 1:5000.

Molecular Weight 65kD

Product Name: Unc18-1 (phospho Ser313) Rabbit

Polyclonal Antibody Catalog #: APRab05606

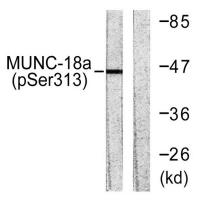

Background

This gene encodes a syntaxin-binding protein. The encoded protein appears to play a role in release of neurotransmitters via regulation of syntaxin, a transmembrane attachment protein receptor. Mutations in this gene have been associated with infantile epileptic encephalopathy-4. Alternatively spliced transcript variants have been described. [provided by RefSeq, Feb 2010], disease:Defects in STXBP1 are the cause of early infantile epileptic encephalopathy type 4 (EIEE4) [MIM:612164]. Affected individuals have neonatal or infantile onset of seizures, suppression-burst pattern on EEG, profound mental retardation, and MRI evidence of hypomyelination., function:May participate in the regulation of synaptic vesicle docking and fusion, possibly through interaction with GTP-binding proteins. Essential for neurotransmission and binds syntaxin, a component of the synaptic vesicle fusion machinery probably in a 1:1 ratio. Can interact with syntaxins 1, 2, and 3 but not syntaxin 4. May play a role in determining the specificity of intracellular fusion reactions., similarity:Belongs to the STXBP/unc-18/SEC1 family., subunit:Binds SYTL4 and STX1A., tissue specificity:Brain and spinal cord. Highly enriched in axons..

Research Area

Image Data

Western blot analysis of lysates from COS7 cells treated with PMA 125ng/ml 30 ', using MUNC-18a (Phospho-Ser313)

Antibody. The lane on the right is blocked with the phospho peptide.

Note
