

## Summary

p57 (Acetyl Lys278) Rabbit Polyclonal Antibody	
Rabbit Polyclonal Antibody	
Rabbit	
WB,ELISA	
Human, Mouse, Rat	

### Performance

Conjugation	Unconjugated	
Modification	Acetyl Antibody	
lsotype	IgG	
Clonality	Polyclonal	
Form	Liquid	
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw	
Storage	cycles.	
Buffer	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.	
Purification	Affinity purification	

### Immunogen

Gene Name	CDKN1C	
Alternative Names	CDKN1C; KIP2; Cyclin-dependent kinase inhibitor 1C; Cyclin-dependent kinase inhibitor	
	р57; р57Кір2	
Gene ID	1028.0	
SwissProt ID	P49918.The antiserum was produced against synthesized Acetyl-peptide derived from	
	human p57Kip2 around the Acetylation site of Lys278. AA range:241-290	

# Application

Dilution Ratio	WB 1:500 - 1:2000. ELISA: 1:20000
Molecular Weight	33kD

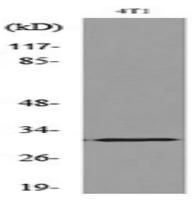

#### Background

This gene is imprinted, with preferential expression of the maternal allele. The encoded protein is a tight-binding, strong inhibitor of several G1 cyclin/Cdk complexes and a negative regulator of cell proliferation. Mutations in this gene are implicated in sporadic cancers and Beckwith-Wiedemann syndorome, suggesting that this gene is a tumor suppressor candidate. Three transcript variants encoding two different isoforms have been found for this gene. [provided by RefSeq, Oct 2010],disease:Defects in CDKN1C are a cause of Beckwith-Wiedemann syndrome (BWS) [MIM:130650]. BWS is a genetically heterogeneous disorder characterized by anterior abdominal wall defects including exomphalos (omphalocele), pre- and postnatal overgrowth, and macroglossia. Additional less frequent complications include specific developmental defects and a predisposition to embryonal tumors,disease:Defects in CDKN1C are involved in tumor formation.,function:Potent tight-binding inhibitor of several G1 cyclin/CDK complexes (cyclin E-CDK2, cyclin D2-CDK4, and cyclin A-CDK2) and, to lesser extent, of the mitotic cyclin B-CDC2. Negative regulator of cell proliferation. May play a role in maintenance of the non-proliferative state throughout life.,similarity:Belongs to the CDI family.,tissue specificity:Expressed in the heart, brain, lung, skeletal muscle, kidney, pancreas and testis. High levels are seen in the placenta while low levels are seen in the liver.,

Cell\_Cycle\_G1S;Cell\_Cycle\_G2M\_DNA;

### Image Data

Western blot analysis of lysate from 4T1 cells, using p57Kip2 (Acetyl-Lys278) Antibody.

Western Blot analysis of 4T1 cells using Acetyl-p57 (K278) Polyclonal Antibody.. Secondary antibody was diluted at 1:20000

#### Note

For research use only.
