Product Name: Calnexin Rabbit Polyclonal Antibody

Catalog #: APRab07862

Summary

Production Name Calnexin Rabbit Polyclonal Antibody

Description Rabbit Polyclonal Antibody

Host Rabbit

Application WB,IHC,IF,ELISA **Reactivity** Human,Mouse,Rat

Performance

ConjugationUnconjugatedModificationUnmodified

Isotype IgG

Clonality Polyclonal Form Liquid

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw

cycles.

Buffer Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.

Purification Affinity purification

Immunogen

Storage

Gene Name CANX

CANX; Calnexin; IP90; Major histocompatibility complex class I antigen-binding protein

p88; p90

Gene ID 821.0

P27824.The antiserum was produced against synthesized peptide derived from human **SwissProt ID**

Calnexin. AA range:543-592

Application

WB 1:500 - 1:2000. IHC-p: 1:100-300 ELISA: 1:20000. IF 1:100-300 Not yet tested in

Dilution Ratio

other applications.

Molecular Weight 90kD

Product Name: Calnexin Rabbit Polyclonal Antibody

Catalog #: APRab07862

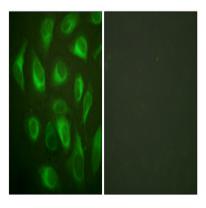

Background

This gene encodes a member of the calnexin family of molecular chaperones. The encoded protein is a calcium-binding, endoplasmic reticulum (ER)-associated protein that interacts transiently with newly synthesized N-linked glycoproteins, facilitating protein folding and assembly. It may also play a central role in the quality control of protein folding by retaining incorrectly folded protein subunits within the ER for degradation. Alternatively spliced transcript variants encoding the same protein have been described. [provided by RefSeq, Jul 2008],function:Calcium-binding protein that interacts with newly synthesized glycoproteins in the endoplasmic reticulum. It may act in assisting protein assembly and/or in the retention within the ER of unassembled protein subunits. It seems to play a major role in the quality control apparatus of the ER by the retention of incorrectly folded proteins.,online information:Calnexin entry,similarity:Belongs to the calreticulin family,,subcellular location:Identified by mass spectrometry in melanosome fractions from stage I to stage IV.,

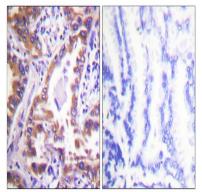

Research Area

Antigen processing and presentation;

Image Data

Immunofluorescence analysis of HeLa cells, using Calnexin Antibody. The picture on the right is blocked with the synthesized peptide.

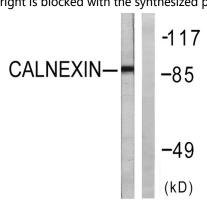

Immunohistochemistry analysis of paraffin-embedded human lung carcinoma tissue, using Calnexin Antibody. The picture
