## Background

**Product Name: DGAT2L6 Rabbit Polyclonal Antibody**  
**Catalog #: APRab09940**

This gene is a member of the diacylglycerol acyltransferase 2 family. The encoded protein is a putative acyltransferase and is most likely involved in the synthesis of di- or triacylglycerol, however its substrate specificity is currently unknown. [provided by RefSeq, Feb 2015],function:Probable acyltransferase uses fatty acyl-CoA as substrate (By similarity). Has no wax synthase activity to produce wax esters.,similarity:Belongs to the diacylglycerol acyltransferase family.,tissue specificity:Expressed in all tissues tested except pancreas.,

## Research Area

## Image Data
