Catalog #: APRab18809

Summary

Production Name TF Rabbit Polyclonal Antibody

Description Rabbit Polyclonal Antibody

Host Rabbit

Application WB,IHC,ELISA

Reactivity Human,Rat,Mouse

Performance

ConjugationUnconjugatedModificationUnmodified

Isotype IgG

Clonality Polyclonal Form Liquid

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw

cycles.

Buffer Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.

Purification Affinity purification

Immunogen

Storage

Gene Name F3

Alternative Names F3; Tissue factor; TF; Coagulation factor III; Thromboplastin; CD142

Gene ID 2152.0

P13726.The antiserum was produced against synthesized peptide derived from the

Internal region of human F3. AA range:131-180

Application

SwissProt ID

Dilution Ratio WB 1:500 - 1:2000. IHC: 1:100-300 ELISA: 1:20000...

Molecular Weight 33kD

Background

C EnkiLife

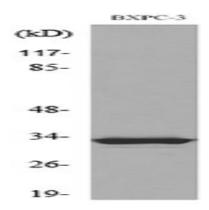

Catalog #: APRab18809

This gene encodes coagulation factor III which is a cell surface glycoprotein. This factor enables cells to initiate the blood coagulation cascades, and it functions as the high-affinity receptor for the coagulation factor VII. The resulting complex provides a catalytic event that is responsible for initiation of the coagulation protease cascades by specific limited proteolysis. Unlike the other cofactors of these protease cascades, which circulate as nonfunctional precursors, this factor is a potent initiator that is fully functional when expressed on cell surfaces. There are 3 distinct domains of this factor: extracellular, transmembrane, and cytoplasmic. This protein is the only one in the coagulation pathway for which a congenital deficiency has not been described. Alternate splicing results in multiple transcript variants.[provided by RefSeq, May 2010], function:Initiates blood coagulation by forming a complex with circulating factor VII or VIIa. The [TF:VIIa] complex activates factors IX or X by specific limited protolysis. TF plays a role in normal hemostasis by initiating the cell-surface assembly and propagation of the coagulation protease cascade.,induction:TF expression is highly dependent upon cell type. TF can also be induced by the inflammatory mediators interleukin 1 and TNF, as well as by endotoxin, to appear on monocytes and vascular endothelial cells as a component of cellular immune response.,online information:The Singapore human mutation and polymorphism database,online information:Tissue factor entry,similarity:Belongs to the tissue factor family.,

Research Area

Complement and coagulation cascades;

Image Data

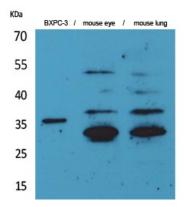

Western blot analysis of lysate from BXPC-3 cells, using F3 Antibody.

Catalog #: APRab18809

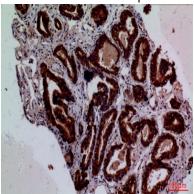

Western Blot analysis of BXPC-3, mouse eye, mouse lung cells using TF Polyclonal Antibody.. Secondary antibody was diluted at 1:20000

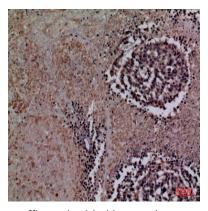

Immunohistochemical analysis of paraffin-embedded human-prostate-cancer, antibody was diluted at 1:100

Immunohistochemical analysis of paraffin-embedded human-prostate-cancer, antibody was diluted at 1:100

Catalog #: APRab18809

Immunohistochemical analysis of paraffin-embedded human-lung-cancer, antibody was diluted at 1:100
