

Summary

Name	B-Defensin 4A
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/µg as determined by LAL test.
Construction	Recombinant Human Beta-Defensin 4A is produced by our E.coli expression system and the target gene encoding Gly24-Pro64 is expressed.
Accession #	O15263
Host	E.coli
Species	Human
Predicted Molecular Mass	4.33 KDa
Formulation	Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4.
Formulation Shipping	The product is shipped at ambient temperature. Upon receipt, store it

Background

Product Name: Recombinant Human DEFB4A Catalog #: PEH0143

Alternative NamesBeta-Defensin 4A; Beta-Defensin 2; BD-2; hBD-2; Defensin; Beta 2; Skin-
Antimicrobial Peptide 1; SAP1; DEFB4A; DEFB102; DEFB2; DEFB4; DEFB4BBackgroundβ-Defensin 4A is a membrane-active cationic peptide that functions in
inflammation and innate immune responses. There are at least 30 β-Defensins,
which are distinguished from α-Defensins by the connectivity pattern of their three
intermolecular disulfide bonds. Members of the Defensin family are highly similar
in protein sequence. This gene encodes Defensin, DEFB4;, which has broad-
spectrum antimicrobial activity and may play an important role in innate epithelial
defense. They are highly expressed in skin and tonsils, and to a lesser extent in
trachea, uterus, kidney, thymus, adenoid, pharynx and tongue. β-Defensin 4A has
low expression in salivary gland, bone marrow, colon, stomach, polyp and larynx.
No expression in small intestine. The 45 amino acid mature human BD3 shares 38%
and 33% amino acid sequence identity with mouse and rat BD3, respectively.
