

# Summary

Name	CCL27/CTACK
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/µg as determined by LAL test.
Construction	Recombinant Human C-C Motif Chemokine 27 is produced by our E.coli
Accession #	expression system and the target gene encoding Phe25-Gly112 is expressed. Q9Y4X3
Host	E.coli
Species	Human
Predicted Molecular Mass	10.1 KDa
Formulation	Lyophilized from a 0.2 µm filtered solution of 20mM PB, 100mM Nacl, 6% Trehalose, 4% Mannitol, 0.05% Tween80, pH7.0.
Formulation Shipping	Trehalose, 4% Mannitol, 0.05% Tween80, pH7.0. The product is shipped at ambient temperature. Upon receipt, store it
	Trehalose, 4% Mannitol, 0.05% Tween80, pH7.0.

# Background

### Product Name: Recombinant Human CCL27 Catalog #: PEH0268

Alternative Names	C-C Motif Chemokine 27; CC Chemokine ILC; Cutaneous T-Cell-Attracting Chemokine; CTACK; Eskine; IL-11 R-Alpha-Locus Chemokine; Skinkine; Small- Inducible Cytokine A27; CCL27; ILC; SCYA27
Background	Human Chemokine (C-C Motif) Ligand 27 (CCL27) is a small cytokine that is a member of the CC chemokine family; it is expressed in numerous tissues, including gonads, thymus, placenta and skin. CCL27 elicits its chemotactic effects by binding to the chemokine receptor CCR10. Predominantly expressed in the skin, CCL27 is associated with T cell-mediated inflammation of the skin. Human and Mouse CCL27 share 84% sequence identity in the mature form.
