Product Name: Recombinant Human CCL3

Catalog #: PEH0270

Summary

Name CCL3/MIP-1 alpha/MIP-1a/C-C Motif Chemokine 3

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human C-C Motif Chemokine 3 is produced by our E.coli

expression system and the target gene encoding Ser24-Ala92 is expressed.

Accession # P10147

Host E.coli

Species Human

Predicted Molecular Mass 7.5 KDa

Formulation Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Lyophilized protein should be stored at \leq -20°C, stable for one year after receipt.

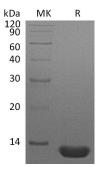

Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at \leq -20°C for 3 months.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. SCYA3

Background Human Chemokine (C-C Motif) Ligand 3 (CCL3) is a small cytokine belonging to

the CC chemokine family. CCL3 is primarily expressed in T cells, B cells, and monocytes after antigen or mitogen stimulation. CCL3 exhibits chemoattractive and adhesive effects on lymphocytes. CCL3 exerts multiple effects on hematopoietic precursor cells and inhibits the proliferation of hematopoietic stem cells in vitro as well as in vivo. CCR1 and CCR5 have been identified as functional

receptors for CCL3.
