Product Name: Recombinant Human 4HPPD (N-6His)

Catalog #: PEH0806

Summary

Name HPD/PPD/4HPPD/HPPDase

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human 4-Hydroxyphenylpyruvate Dioxygenase is produced by

our E.coli expression system and the target gene encoding Met1-Met393 is

expressed with a 6His tag at the N-terminus.

Accession # P32754

Host E.coli

Species Human

Predicted Molecular Mass 47.1 KDa

Formulation Supplied as a 0.2 µm filtered solution of 20mM Tris-HCl, 50mM NaCl, 1mM DTT,

20% Glycerol, pH 8.0.

Shipping The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

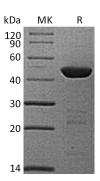

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Background

Alternative Names 4-Hydroxyphenylpyruvate Dioxygenase; 4-Hydroxyphenylpyruvic Acid Oxidase;

4HPPD; HPD; HPPDase; HPD; PPD

Background 4-Hydroxyphenylpyruvate Dioxygenase (4HPPD) belongs to the 4HPPD family.

4HPPD is a key enzyme in the degradation of tyrosine, which catalyzes the second

Product Name: Recombinant Human 4HPPD (N-6His) Catalog #: PEH0806

reaction in the catabolism of tyrosine the conversation of 4-hydroxyphenylpyruvate to homogentisate. 4HPPD exists in homodimer forms, which uses zinc as a cofactor to catalyze the third step in the conversion of L-phenylalanine to fumarate and acetoacetic acid. When the active 4HPPD enzyme concentration is low in the human body, it results in high levels of tyrosine concentration in the blood, which can cause mild mental retardation at birth, and degradation in vision as a patient grows older.
