

Product Name: Recombinant Human BMP-4
Catalog #: PEH2467

Summary

Name	BMP-4
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<0.01 EU/μg as determined by LAL test.
Construction	Recombinant Human Bone morphogenetic protein 4 is produced by our E.coli expression system and the target gene encoding Ser293-Arg408.
Accession #	P12644
Host	E.coli
Species	Human
Predicted Molecular Mass	13.3 KDa
Formulation	Supplied as a 0.2 μm filtered solution of 4mM HCl.
Shipping	The product is shipped on dry ice/polar packs. Upon receipt, store it immediately at the temperature listed below.
Stability&Storage	Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.
Reconstitution	0.00.0

Background

Alternative Names Bone morphogenetic protein 4; BMP-4; BMP4; BMP2B; DVR4

Background Bone morphogenetic protein-4 (BMP-4) is one of nine structurally related BMPs belonging to the transforming growth factor-beta (TGF-beta) superfamily of

Product Name: Recombinant Human BMP-4

secreted proteins. Mature BMP-4 is a dimer that binds to a multimeric transmembrane receptor with serine/threonine kinase activity. BMP-4 has important roles as a signalling molecule in embryonic tissues, including the developing central and peripheral nervous system, musculature and skeleton. BMP-4 as well as its receptors and their signal transduction pathways play a crucial role in the control of the differentiation and proliferation of the different cell types that constitute the anterior pituitary.
