## Product Name: Recombinant Human SEMA4D (C-6His) Catalog #: PHH0276

### **Summary**

Name SEMA4D/CD100/Semaphorin 4D

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human Semaphorin 4D is produced by our Mammalian

expression system and the target gene encoding Met22-Arg734 is expressed

with a 6His tag at the C-terminus.

Accession # Q92854

Host **Human Cells** 

**Species** Human

**Predicted Molecular Mass** 80.2 KDa

Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4. **Formulation** 

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

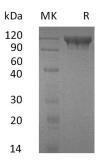

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

## **Background**

# Product Name: Recombinant Human SEMA4D (C-6His) Catalog #: PHH0276

Alternative Names Semaphorin-4D; A8;BB18; GR3; CD100

**Background** Semaphorin-4D is also known as A8,BB18, GR3, CD100. Semaphorin-4D belongs to

the semaphorin family containing 1 Ig-like C2-type domain, 1 PSI domain and 1 Sema domain. It is the cell surface receptor for PLXN1B and PLXNB2 that plays an important role in cell-cell signaling. It promotes the migration of cerebellar granule cells and of endothelial cells, regulates dendrite and axon branching and morphogenesis. Semaphorin-4D Plays a role in the immune system; Promotes signaling via SRC and PTK2B/PYK2, which then mediates activation of

phosphatidylinositol 3-kinase and of the AKT1 signaling cascade.
