Product Name: Recombinant Human CD47 (C-6His)

Catalog #: PHH0353

Summary

Name CD47/IAP/OA3/Leukocyte Surface Antigen CD47/Antigenic surface

determinant protein OA3/Integrin-associated protein/Protein MER6

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Leukocyte Surface Antigen CD47 is produced by our

Mammalian expression system and the target gene encoding Gln19-Pro139 is

expressed with a 6His tag at the C-terminus.

Accession # Q08722

Host Human Cells

Species Human

Predicted Molecular Mass 14.76 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of 10mM Tris-Citrate, 150mM NaCl, pH

8.0.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at $\leq -70^{\circ}$ C, stable for 6 months after receipt. Store at $\leq -70^{\circ}$ C, stable for 3

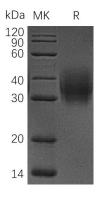

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Catalog #: PHH0353

Background

Alternative Names Leukocyte Surface Antigen CD47; Antigenic Surface Determinant Protein OA3;

Integrin-Associated Protein; IAP; Protein MER6; CD47; MER6

CD47(Integrin-Associated Protein,IAP) is a 40 - 60 kDa

CD47(Integrin-Associated Protein,IAP) is a 40 - 60 kDa variably glycosylated atypical member of the immunoglobulin superfamily. The ubiquitously expressed CD47 binds to SIRP family members on macrophages, neutrophils, and T cells. CD47 is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The protein is also a receptor for the C-terminal cell-binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This protein has broad tissue

distribution, and is reduced in expression on Rh erythrocytes.

Note

For Research Use Only, Not for Diagnostic Use.
