Product Name: Recombinant Human OSMRB (C-6His)

Catalog #: PHH0922

Summary

Name IL-31RB/OSMRB

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Oncostatin-M-Specific Receptor Subunit Beta is

produced by our Mammalian expression system and the target gene

encoding Glu28-Ser739 is expressed with a 6His tag at the C-terminus.

Accession # Q99650

Host Human Cells

Species Human

Predicted Molecular Mass 82.03 KDa

Formulation Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, pH 7.2.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

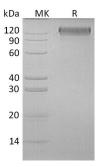

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Background

Product Name: Recombinant Human OSMRB (C-6His) Catalog #: PHH0922

Alternative Names Oncostatin-M-Specific Receptor Subunit Beta; Interleukin-31 Receptor Subunit

Beta; IL-31 Receptor Subunit Beta; IL-31R Subunit Beta; IL-31R-Beta; IL-31RB;

OSMR; OSMRB

Background Oncostatin-M-Specific Receptor Subunit β (OSMRβ) is a 150 - 180 kDa member of the IL-6 receptor family. OSMRβ associates with gp130 to form the type II OSM

the IL-6 receptor family. OSMR β associates with gp130 to form the type II OSM receptor, the receptor is responsive to OSM. Gp130 subunit is shared by other IL-6 family cytokine receptors, and OSMR β associates with gp130-like receptor (GPL) to form a receptor complex responsive to IL-31. The human OSMR β cDNA encodes a 979 amino acid (aa) precursor, the precursor includes a 27 aa signal sequence, a 712 aa extracellular domain (ECD), a 22 aatransmembrane segment, and a 218 aa cytoplasmic domain. The ECD contains one partial and one complete hematopoietin domain, an Ig-like domain, and three Fibronectin type-III domains.
