Product Name: Recombinant Human LMIR2 (C-6His) Catalog #: PHH1095

C EnkiLife

Summary

Name LMIR2/CD300C

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Leukocyte Mono Ig-like Receptor 2 is produced by our

Mammalian expression system and the target gene encoding Gly21-Arg183 is

expressed with a 6His tag at the C-terminus.

Accession # Q08708

Host Human Cells

Species Human

Predicted Molecular Mass 18.89 KDa

Formulation Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, pH 7.2.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

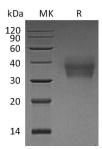

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Background

Product Name: Recombinant Human LMIR2 (C-6His) Catalog #: PHH1095

Alternative Names CMRF35-Like Molecule 6; CLM-6; CD300 Antigen-Like Family Member C; CMRF35-

A1; CMRF-35; Immunoglobulin Superfamily Member 16; IgSF16; CD300c; CD300C;

CMRF35; CMRF35A; CMRF35A1; IGSF16

BackgroundCD300C is a single-pass type I membrane protein which belongs to the immunoregulatory signaling (IRS) family. CD300C contains one Iq-like V-type

domain and is present on the surface of natural killer cells, granulocytes, most myeloid cells, dendritic cells, and a subpopulation of T and B lymphocytes. The CD300C (CMRF-35A) and CD300A (CMRF-35H) molecules are homologous leukocyte surface proteins. CD300a and CD300C play an important role in the cross-regulation of TNF-alpha and IFN-alpha secretion from pDCs. CD300A and CD300C are indistinguishable on the surface of NK cells. The ligand for CD300C is

presently unknown.
