Product Name: Recombinant Human MGAT2 (C-6His) Catalog #: PHH1158

Summary

Name MGAT2/Mannoside acetylglucosaminyltransferase 2

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Mannoside Acetylglucosaminyltransferase 2 is

produced by our Mammalian expression system and the target gene

encoding Arg30-Gln447 is expressed with a 6His tag at the C-terminus.

Accession # Q10469

Host Human Cells

Species Human

Predicted Molecular Mass 49.3 KDa

Formulation Supplied as a 0.2 µm filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0.

Shipping The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

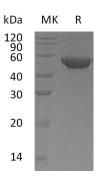

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Acetylglucosaminyltransferase II; MGAT2

Product Name: Recombinant Human MGAT2 (C-6His) Catalog #: PHH1158

Background

Mannoside Acetylglucosaminyltransferase 2 (MGAT2) is a single-pass type II membrane protein that contains the typical glycosyltransferase domains: a short N-terminal cytoplasmic domain, a hydrophobic non-cleavable signal-anchor domain and a C-terminal catalytic domain. MGAT2 catalyzes an essential step in the conversion of oligo-mannose to complex N-glycans. Defects in MGAT2 are the cause of congenital disorder of glycosylation type 2A.
