Product Name: Recombinant Human BTN1A1 (C-Fc)

C EnkiLife

Catalog #: PHH2191

Summary

Name BTN1A1/Butyrophilin Subfamily 1 Member A1

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Butyrophilin Subfamily 1 Member A1 is produced by

our Mammalian expression system and the target gene encoding Ala27-

Arg242 is expressed with a human IgG1 Fc tag at the C-terminus.

Accession # Q13410

Host Human Cells

Species Human

Predicted Molecular Mass 50.8 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

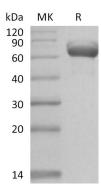

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Background

Product Name: Recombinant Human BTN1A1 (C-Fc) Catalog #: PHH2191

Alternative Names Butyrophilin Subfamily 1 Member A1; BT; BTN1A1; BTN

Background Butyrophilin Subfamily 1 Member A1 (BTN1A1) is the major protein associated with

fat droplets in the milk. It belongs the immunoglobulin superfamily. BTN1A1 acts as a specific membrane-associated receptor for the association of cytoplasmic droplets with the apical plasma membrane. It is localized to the major histocompatibility complex (MHC) class I region of 6p. It may have arisen relatively recently in evolution by the shuffling of exons between 2 ancestral gene families. It is shown that BTN1A1 inhibits the proliferation of CD4 and CD8 T-cells activated by

anti-CD3 antibodies, T-cell metabolism and IL2 and IFNG secretion.
