Product Name: Recombinant Human Wnt3a V3

Catalog #: PHH2445

Summary

Name Wnt3a V3

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <0.01 EU/μg as determined by LAL test.

Construction Recombinant Human Wnt3a V3 is a Wnt Surrogate Protein and is produced

by our Mammalian expression system.

Accession #

Host Human cells

Species Human

Predicted Molecular Mass 58.5kDa

Formulation Supplied as a 0.2 µm filtered solution of 25mM Tris-HCl, 500mM NaCl, pH8.2.

Shipping The product is shipped on dry ice/polar packs. Upon receipt, store it immediately

at the temperature listed below.

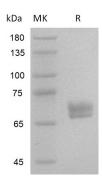

Stability&Storage Store at \leq -70°C, stable for 6 months after receipt. Store at \leq -70°C, stable for 3

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution 0.00.0

SDS-PAGE image

Background

Alternative Names Wnt Surrogate-Fc Fusion Protein; Wnt Surrogate

Background Wnt-3a is one of 19 vertebrate members of the Wingless-type MMTV integration

site (Wnt) family of highly conserved cysteine-rich secreted glycoproteins important for normal developmental processes. WNT signaling plays key roles in

Product Name: Recombinant Human Wnt3a V3

Catalog #: PHH2445

the control of development, homeostasis, and regeneration of many essential organs and tissues, including bone, liver, skin, stomach, intestine, lung, kidney, central nervous system, mammary gland, taste bud, ovary, cochlea, and vessels among many others. Modulation of WNT signaling pathways has potential for treatment of degenerative diseases and tissue injuries. And they signal through FZD1-10 and LRP5 or 6, two families of receptors. Endogenous WNTs bind to multiple FZDs and are heavily modified posttranslationally, making them difficult to manufacture consistently. WNT surrogate molecules phenocopied endogenous ligand activities in in vitro reporter assays and intestine organoid functional assays. WNT surrogate molecules can be selective for individual FZD or a subfamily of FZDs in combination with LRP5 or LRP6, depending on the binder specificities.
