

Summary

Name	IL-17RD/SEF
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/μg as determined by LAL test.
Construction	Recombinant Mouse Interleukin-17 receptor D is produced by our Mammalian expression system and the target gene encoding Cys17-Arg299 is expressed with a 6His tag at the C-terminus.
Accession #	Q8JZL1
Host	Human Cells
Species	Mouse
Predicted Molecular Mass	31.8 KDa
Formulation	Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.
Stability&Storage	Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.
Reconstitution	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100μg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Background

Product Name: Recombinant Mouse IL-17RD (C-6His)
Catalog #: PHM2387

Alternative Names

Interleukin-17 receptor D; IL-17 receptor D; IL-17RD; Interleukin-17 receptor-like protein; Il17rd; mSef; Il17rlm; Sef

Background

The Il17rd gene encodes a transmembrane protein of the IL-17 receptor family. IL-17RD, originally termed similar expression to fibroblast growth factor (fgf) genes (Sef) as it belonged to the FGF synexpression group in zebrafish development, is the only orphan receptor without any known ligand within the IL-17R family. IL-17RD is a transmembrane protein shown to inhibit fibroblast growth factor signaling in developmental and cancer contexts, however its role as a tumor suppressor remains to be fully elucidated. The full-length IL-17 RD isoform is expressed in most adult tissues and during embryonic development.
