

## Summary

| Name                     | PD-L1/B7-H1/CD274/Programmed Cell Death 1 Ligand 1  |
|--------------------------|---|
| Purity                   | Greater than 95% as determined by reducing SDS-PAGE   |
| Endotoxin level          | <1 EU/µg as determined by LAL test.   |
| Construction             | Recombinant Rat Programmed Cell Death 1 Ligand 1 is produced by our<br>Mammalian expression system and the target gene encoding Ala18-Thr238 is<br>expressed with a 6His tag at the C-terminus.   |
| Accession #              | D4AE25  |
| Host                     | Human Cells   |
| Species                  | Rat   |
| Predicted Molecular Mass | 26.1 KDa  |
| Formulation              | Lyophilized from a 0.2 $\mu$ m filtered solution of PBS, pH 7.4.  |
| Shipping                 | The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.  |
| Stability&Storage        | Store at $\leq$ -70°C, stable for 6 months after receipt. Store at $\leq$ -70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.  |
| Reconstitution           | Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is<br>not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve<br>the lyophilized protein in distilled water. Please aliquot the reconstituted solution<br>to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not<br>mix by vortex or pipetting. It is not recommended to reconstitute to a<br>concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled<br>water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |

## Background

**Alternative Names** B7-H; B7H1; B7-H1; B7H1PDCD1L1; CD274 antigenMGC142294; CD274 molecule; CD274; PDCD1L1; PDCD1LG1; PDL1; PD-L1; PD-L1B7 homolog 1; PDL1PDCD1 ligand 1; programmed cell death 1 ligand 1; Programmed death ligand 1 CD274, also known as B7-H1 or programmed death ligand 1 (PD-L1), is a 40 kD Background type I transmembrane protein and a member of the B7 family within the immunoglobulin receptor superfamily. Programmed death-1 ligand-1 (PD-L1, CD274, B7-H1) has been identified as the ligand for the immunoinhibitory receptor programmed death-1(PD1/PDCD1) and has been demonstrated to play a role in the regulation of immune responses and peripheral tolerance. By binding to PD1 on activated T-cells and B-cells, PD-L1 may inhibit ongoing T-cell responses by inducing apoptosis and arresting cell-cycle progression. Accordingly, it leads to growth of immunogenic tumor growth by increasing apoptosis of antigen specific T cells and may contribute to immune evasion by cancers. PD-L1 thus is regarded as promising therapeutic target for human autoimmune disease and malignant cancers.

## Note

For Research Use Only, Not for Diagnostic Use.
