Catalog #: PHV1909

## Summary

Name	B7-H4/VTCN1/B7 Homolog 4/B7S1/B7x
Purity	Greater than 95% as determined by reducing SDS-PAGE
Endotoxin level	<1 EU/µg as determined by LAL test.
Construction	Recombinant Rhesus Macaque B7-H4 is produced by our Mammalian expression system and the target gene encoding Phe29-Ala258 is expressed with a 6His tag at the C-terminus.
Accession #	F7B770
Host	Human Cells
Species	Rhesus macaque
Predicted Molecular Mass	26.4 KDa
Formulation	Lyophilized from a 0.2 $\mu$ m filtered solution of PBS, pH 7.4.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.
Stability&Storage	Store at $\leq$ -70°C, stable for 6 months after receipt. Store at $\leq$ -70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.
Reconstitution	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

## Background

Alternative NamesB7S1; B7x; Vtcn1; B7h.5; B7-H4; B7H4T-cell costimulatory molecule B7x;<br/>B7S1VCTN1; B7XPRO1291; FLJ22418; Immune costimulatory protein B7-H4; Protein<br/>B7S1; T cell costimulatory molecule B7x; V-set domain containing T cell activation<br/>inhibitor 1; V-set domain-containing T-cell activation inhibitor 1<br/>B7 Homolog 4 (B7-H4) is glycosylated member of the B7 family of immune<br/>costimulatory proteins.It is widely expressed, including in kidney, liver, lung,<br/>pancreas, placenta, prostate, spleen, testis and thymus. B7-H4 negatively regulates<br/>T-cell-mediated immune response by inhibiting T-cell activation, proliferation,<br/>cytokine production and development of cytotoxicity. When expressed on the cell<br/>surface of tumor macrophages, plays an important role, together with regulatory<br/>T-cells (Treg), in the suppression of tumor-associated antigen-specific T-cell<br/>immunity. It also involved in promoting epithelial cell transformation.
