Catalog #: PHV2078

Summary

Name GITR Ligand/TNFSF18

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/µg as determined by LAL test.

Construction Recombinant Cynomolgus TNF Superfamily Member 18 is produced by our

Mammalian expression system and the target gene encoding Glu74-Ser199 is

expressed with a 6His tag at the C-terminus.

Accession # A0A2K5UCD9

Host **Human Cells Species** Cynomolgus

Predicted Molecular Mass 15.3 KDa

Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4. **Formulation**

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Store at ≤-70°C, stable for 6 months after receipt. Store at ≤-70°C, stable for 3 Stability&Storage

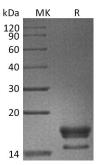

months under sterile conditions after opening. Please minimize freeze-thaw

cycles.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Background

Product Name: Recombinant Cynomolgus GITR Ligand (C.6His) Enkille Catalog #: PHV2078

Tumor necrosis factor ligand superfamily member 18; TNFSF18; Activation-**Alternative Names**

inducible TNF-related ligand; Glucocorticoid-induced TNF-related ligand; AITRL;

TNFSF18 is a single-pass type II membrane protein. It is expressed at high levels in Background the small intestine, ovary, testis, kidney and endothelial cells. TNFSF18 cytokine

binds to TNFRSF18/AITR/GITR. It regulates T-cell responses, and functions as costimulator and lower the threshold for T-cell activation and T-cell proliferation. It is Important for interactions between activated T-lymphocytes and endothelial cells and Promotes leukocyte adhesion to endothelial cells. TNFSF18 mediates activation of NF-kappa-B. As Triggers increased phosphorylation of STAT1 and upregulates expression of VCAM1 and ICAM1. It also regulates migration of

monocytes from the splenic reservoir to sites of inflammation.
