

# Summary

Production Name	Hic-5 Rabbit Polyclonal Antibody				
Description	Rabbit Polyclonal Antibody				
Host	Rabbit				
Application	IF,IHC,WB,ELISA				
Reactivity	Human, Mouse, Rat				

## Performance

Conjugation	Unconjugated
Modification	Unmodified
lsotype	IgG
Clonality	Polyclonal
Form	Liquid
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw
	cycles.
Buffer	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.
Purification	Affinity purification

## Immunogen

Gene Name	TGFB1I1				
	TGFB1I1; ARA55; Transforming growth factor beta-1-induced transcript 1 protein;				
Alternative Names	Androgen receptor coactivator 55 kDa protein; Androgen receptor-associated protein				
	of 55 kDa; Hydrogen peroxide-inducible clone 5 protein; Hic-5				
Gene ID	7041.0				
SwissProt ID	O43294. The antiserum was produced against synthesized peptide derived from human				
	Hic-5. AA range:31-80				

# Application

	WB 1:500-2000	IHC 1:100 -	1:300. IF	1:200 -	1:1000. EL	ISA: 1:10000.	Not yet tested in
Dilution Ratio							
	other applicatio	ns.

### Background

transforming growth factor beta 1 induced transcript 1(TGFB1I1) Homo sapiens This gene encodes a coactivator of the androgen receptor, a transcription factor which is activated by androgen and has a key role in male sexual differentiation. The encoded protein is thought to regulate and rogen receptor activity and may have a role to play in the treatment of prostate cancer. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2009], domain: The LD (leucine and aspartate-rich) motif 3 mediates interaction with GIT1 and functions as a nuclear export signal., domain: The LIM zinc-binding domains mediate glucocorticoid receptor coactivation and interaction with AR, CRIP2, ILK, LIMS1, NR3C1, PPARG, TCF3, TCF7L2, SLC6A3 and SMAD3. The LIM zinc-binding 2 and LIM zincbinding 3 domains mediate targeting to focal adhesions and actin stress fibers. The LIM zinc-binding 3 and LIM zincbinding 4 domains mediate interaction with TRAF4 and MAPK15. The LIM zinc-binding 4 domain mediates interaction with HSPB1, homooligomerization and targeting to the nuclear matrix. The LIM zinc-binding 3 domain mediates interaction with PTPN12, function: Functions as a molecular adapter coordinating multiple protein-protein interactions at the focal adhesion complex and in the nucleus. Links various intracellular signaling modules to plasma membrane receptors and regulates the Wnt and TGFB signaling pathways. May also regulate SLC6A3 and SLC6A4 targeting to the plasma membrane hence regulating their activity. In the nucleus, functions as a nuclear receptor coactivator regulating glucocorticoid, androgen, mineralocorticoid and progesterone receptor transcriptional activity. May play a role in the processes of cell growth, proliferation, migration, differentiation and senescence. May have a zinc-dependent DNA-binding activity.,induction:Upregulated by TNF-alpha and hydrogen peroxide.,PTM:Phosphorylated by gonadotropin-releasing hormone-activated SRC., similarity: Belongs to the paxillin family., similarity: Contains 4 LIM zinc-binding domains., subcellular location: Associated with the actin cytoskeleton; colocalizes with stress fibers., subunit: Homooligomer. Interacts with CRIP2, HSPB1, ILK, LIMS1, LIMS2, NCK2, NUDT16L1, PAK, PPARG, PTPN12, TCF3, TCF7L2 and VCL. Forms a complex with GIT1 and ARHGEF7 (By similarity). Interacts with AR/androgen receptor in a ligand-dependent manner. Interacts with CSK, LYN, MAPK15, NR3C1, PPARG, PTK2, PTK2B, SLC6A3, SLC6A4, SMAD3, SRC and talin., tissue specificity: Expressed in platelets, smooth muscle and prostate stromal cells (at protein level).,

### **Research Area**

#### **Image Data**

Immunofluorescence analysis of HeLa cells, using Hic-5 Antibody. The picture on the right is blocked with the synthesized

Immunohistochemistry analysis of paraffin-embedded human lung carcinoma tissue, using Hic-5 Antibody. The picture on the right is blocked with the synthesized peptide.

Western Blot analysis of NIH-3T3 cells using Hic-5 Polyclonal Antibody diluted at 1: 1000
