# **Product Name: MEK-4 Rabbit Polyclonal Antibody**

Catalog #: APRab13806

#### **Summary**

**Production Name** MEK-4 Rabbit Polyclonal Antibody

**Description** Rabbit Polyclonal Antibody

Host Rabbit
Application WB,ELISA

**Reactivity** Human, Mouse, Rat

#### **Performance**

ConjugationUnconjugatedModificationUnmodified

**Isotype** IgG

ClonalityPolyclonalFormLiquid

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw

cycles.

**Buffer** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N.

**Purification** Affinity purification

#### **Immunogen**

Storage

Gene Name MAP2K4

MAP2K4; JNKK1; MEK4; MKK4; PRKMK4; SEK1; SERK1; SKK1; Dual specificity mitogen-

**Alternative Names** activated protein kinase kinase 4; MAP kinase kinase 4; MAPKK 4; JNK-activating kinase

1; MAPK/ERK kinase 4; MEK 4; SAPK/ERK kinase 1; SEK1; Stress-activated pro

**Gene ID** 6416.0

P45985.The antiserum was produced against synthesized peptide derived from human

SEK1/MKK4. AA range:46-95

## **Application**

SwissProt ID

**Dilution Ratio** WB 1:500-2000 ELISA 2000-20000

Molecular Weight 44kD

## **Product Name: MEK-4 Rabbit Polyclonal Antibody**

Catalog #: APRab13806

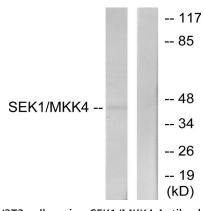

#### **Background**

This gene encodes a member of the mitogen-activated protein kinase (MAPK) family. Members of this family act as an integration point for multiple biochemical signals and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation, and development. They form a three-tiered signaling module composed of MAPKKKs, MAPKKs, and MAPKs. This protein is phosphorylated at serine and threonine residues by MAPKKKs and subsequently phosphorylates downstream MAPK targets at threonine and tyrosine residues. A similar protein in mouse has been reported to play a role in liver organogenesis. A pseudogene of this gene is located on the long arm of chromosome X. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013],catalytic activity:ATP + a protein = ADP + a phosphoprotein.,function:Dual specificity kinase that activates the JUN kinases MAPK8 (JNK1) and MAPK9 (JNK2) as well as MAPK14 (p38) but not MAPK1 (ERK2) or MAPK3 (ERK1).,PTM:Activated by phosphorylation on Ser/Thr by MAP kinase kinase kinases.,similarity:Belongs to the protein kinase superfamily.,similarity:Belongs to the protein kinase family. MAP kinase kinase subfamily,,similarity:Contains 1 protein kinase domain.,subunit:Interacts with SPAG9.,tissue specificity:Abundant expression is seen in the skeletal muscle. It is also widely expressed in other tissues.,

#### Research Area

Regulates Angiogenesis; Stem cell pathway; Regulation of Actin Dynamics; Toll\_Like; Cell Growth; ErbB/HER; B Cell Receptor; MAPK ERK Growth; MAPK G Protein

## **Image Data**

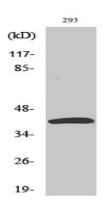

Western blot analysis of lysates from NIH/3T3 cells, using SEK1/MKK4 Antibody. The lane on the right is blocked with the synthesized peptide.
