

Summary

| Production Name | PLC γ 2 Rabbit Polyclonal Antibody |
|-----------------|---|
| Description | Rabbit Polyclonal Antibody |
| Host | Rabbit |
| Application | WB,IHC,ELISA |
| Reactivity | Human, Mouse, Rat |

Performance

| Conjugation | Unconjugated |
|--------------|--|
| Modification | Unmodified |
| lsotype | IgG |
| Clonality | Polyclonal |
| Form | Liquid |
| Storage | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw |
| | cycles. |
| Buffer | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% New type preservative N. |
| Purification | Affinity purification |

Immunogen

| Gene Name | PLCG2 | | | |
|-------------------|--|--|--|--|
| | PLCG2; 1-phosphatidylinositol 4; 5-bisphosphate phosphodiesterase gamma-2; | | | |
| Alternative Names | Phosphoinositide phospholipase C-gamma-2; Phospholipase C-IV; PLC-IV; | | | |
| | Phospholipase C-gamma-2; PLC-gamma-2 | | | |
| Gene ID | 5336.0 | | | |
| SwissProt ID | P16885.The antiserum was produced against synthesized peptide derived from human | | | |
| | PLCG2. AA range:1186-1235 | | | |

Application

| Dilution Ratio | WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:5000 |
|------------------|---|
| Molecular Weight | 147kD |

Background

The protein encoded by this gene is a transmembrane signaling enzyme that catalyzes the conversion of 1-phosphatidyl-1D-myo-inositol 4,5-bisphosphate to 1D-myo-inositol 1,4,5-trisphosphate (IP3) and diacylglycerol (DAG) using calcium as a cofactor. IP3 and DAG are second messenger molecules important for transmitting signals from growth factor receptors and immune system receptors across the cell membrane. Mutations in this gene have been found in autoinflammation, antibody deficiency, and immune dysregulation syndrome and familial cold autoinflammatory syndrome 3. [provided by RefSeq, Mar 2014],catalytic activity:1-phosphatidyl-1D-myo-inositol 4,5-bisphosphate + H(2)O = 1D-myo-inositol 1,4,5trisphosphate + diacylglycerol.,cofactor:Calcium.,function:The production of the second messenger molecules diacylglycerol (DAG) and inositol 1,4,5-trisphosphate (IP3) is mediated by activated phosphatidylinositol-specific phospholipase C enzymes. It is a crucial enzyme in transmembrane signaling.,PTM:Phosphorylated on tyrosine residues; upon ligand-induced activation of a variety of growth factor receptors and immune system receptors. Increases phospholipase activity.,similarity:Contains 1 C2 domain.,similarity:Contains 1 PH domain.,similarity:Contains 2 SH2 domains., domain.,similarity:Contains 2 SH2 domains.,

Research Area

Inositol phosphate metabolism; ErbB_HER; Calcium; Phosphatidylinositol signaling system; VEGF; Natural killer cell mediated cytotoxicity; B_Cell_Antigen; Fc epsilon RI; Fc gamma R-mediated phagocytosis; Leukocyte transendothelial migration; Neurotrophin; Vibrio cholerae infection; Epithelial cell signaling in Helicobacter pylori infection; Pathways in cancer; Glioma; Non-small cell lung cancer;

Image Data

Immunohistochemistry analysis of paraffin-embedded human brain tissue, using PLCG2 Antibody. The picture on the right is blocked with the synthesized peptide.

Product Name: PLC γ2 Rabbit Polyclonal Antibody Catalog #: APRab16249

Western blot analysis of lysates from Raw264.7 cells, treated with PMA 125ng/ml 30 ', using PLCG2 Antibody. The lane on the right is blocked with the synthesized peptide.

Note For research use only.
