Summary

Name IL-2/Interleukin-2/T cell growth factor/TCGF (Mutant)

Purity Greater than 95% as determined by reducing SDS-PAGE

Endotoxin level <1 EU/μg as determined by LAL test.

Construction Recombinant Human Interleukin-2 Superkine is produced by our Mammalian

expression system and the target gene encoding Ala21-Thr153 (L100F, R101D, L105V, I106V, I112F) is expressed with a 6His tag at the C-terminus.

Accession # P60568

Host Human Cells

Species Human

Predicted Molecular Mass 16.5 KDa

Formulation Lyophilized from a 0.2 µm filtered solution of 4mM HCl.

Shipping The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Stability&Storage Lyophilized protein should be stored at \leq -20°C, stable for one year after receipt.

Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of

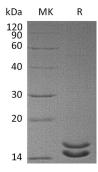

reconstituted samples are stable at \leq -20°C for 3 months.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than $100\mu g/ml$. Dissolve the lyophilized protein in 4mM HCl. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than $100\mu g/ml$. Dissolve the lyophilized protein in 4mM HCl.

Background

Product Name: Recombinant Human IL-2 Superkine (Mutant, C- Eis Kilife Catalog #: PHH1918

Alternative Names Interleukin-2; IL-2; T-Cell Growth Factor; TCGF; Aldesleukin; IL2

Background Interleukin-2(IL-2) is an interleukin, a type of cytokine signaling molecule in the

immune system, belongs to the IL-2 family. It is a powerful immunoregulatory lymphokine produced by T-cells in response to antigenic or mitogenic stimulation. IL-2/IL-2R signaling is required for T-cell proliferation and other fundamental functions that are essential for the immune response. IL-2 stimulates growth and differentiation of B-cells, NK cells, lymphokine-activated killer cells, monocytes, macrophages and oligodendrocytes. New research has shown that IL-2 mutant reduced toxicity while being more potent at stimulating anti-tumor effector

immune cells.
