## **Product Name: Recombinant Human CXCL6 (C-6His)** Catalog #: PHH2136

### **Summary**

CXCL6/C-X-C Motif Chemokine 6 Name

**Purity** Greater than 95% as determined by reducing SDS-PAGE

**Endotoxin level** <1 EU/µg as determined by LAL test.

Construction Recombinant Human C-X-C Motif Chemokine 6 is produced by our

Mammalian expression system and the target gene encoding Gly38-Asn114 is

expressed with a 6His tag at the C-terminus.

Accession # P80162

Host **Human Cells** 

**Species** Human

**Predicted Molecular Mass** 9.35 KDa

**Formulation** Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, 5%

Trehalose, 1mM EDTA, pH 7.4.

**Shipping** The product is shipped at ambient temperature. Upon receipt, store it

immediately at the temperature listed below.

Lyophilized protein should be stored at  $\leq$  -20°C, stable for one year after receipt. Stability&Storage

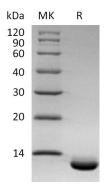

Reconstituted protein solution can be stored at 2-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at  $\leq$  -20°C for 3 months.

Reconstitution Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is

not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. ### **Background**

**Alternative Names** 

**Background** 

C-X-C Motif Chemokine 6; Chemokine Alpha 3; CKA-3; Granulocyte Chemotactic Protein 2; GCP-2; Small-Inducible Cytokine B6; CXCL6; GCP2; SCYB6

Chemokine (C-X-C-Motif) Ligand 6 (CXCL6) is a small cytokine belonging to the CXC chemokine family. It is a potent neutrophil chemotactic and activating factor and it exhibits extensive similarity to other CXC chemokines such as IL-8 and ENA-78. CXCL6 can promote the release of MMP-9 from granulocytes indicating its potential role as an inflammatory mediator. It functionally uses both of the IL-8/CXCL8 receptors to chemoattract neutrophils but that is structurally most related to epithelial cell-derived neutrophil attractant-78 (ENA-78)/CXCL5. The human CXCL6 gene has been cloned and is physically mapped to the CXC chemokine locus on chromosome 4. Mature human CXCL6 is a 75 amino acid (aa) protein with a predicted molecular weight of approximately 8 kDa. Human CXCL6 shares 60% and 67% aa identity with mouse and bovine CXCL6, respectively.
