

# Summary

| Name                     | Reg2/Lithostathine-2   |
|--------------------------|--|
| Purity                   | Greater than 95% as determined by reducing SDS-PAGE  |
| Endotoxin level          | <1 EU/µg as determined by LAL test.  |
| Construction             | Recombinant Mouse Islets Of Langerhans Regenerating Protein 2 is produced<br>by our Mammalian expression system and the target gene encoding Gln23-<br>Ala173 is expressed with a 6His tag at the N-terminus.  |
| Accession #              | Q08731   |
| Host                     | Human Cells  |
| Species                  | Mouse  |
| Predicted Molecular Mass | 17.7 KDa   |
| Formulation              | Lyophilized from a 0.2 $\mu$ m filtered solution of PBS, pH 7.4.   |
| Shipping                 | The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature listed below.   |
| Stability&Storage        | Store at $\leq$ -70°C, stable for 6 months after receipt. Store at $\leq$ -70°C, stable for 3 months under sterile conditions after opening. Please minimize freeze-thaw cycles.   |
| Reconstitution           | Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is<br>not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve<br>the lyophilized protein in distilled water. Please aliquot the reconstituted solution<br>to minimize freeze-thaw cycles.Always centrifuge tubes before opening. #### **Alternative Names**

Background

Regenerating Islet-derived 2;Islet of Langerhans regenerating protein 2;Pancreatic stone protein 2;Pancreatic thread protein 2;PSP;PTP Regenerating protein 2 (Reg2) also known as Lithostathine 2, pancreatic thread

Regenerating protein 2 (Reg2) also known as Lithostathine 2, pancreatic thread protein (PTP2) and pancreatic stone protein 2 (PSP2), is a member of the Reg family of proteins. These small, secreted proteins have been implicated in a range of physiological processes including acting as acute phase reactants, lectins, survival/growth factors for insulin-producing pancreatic beta-cells, neural cells, and epithelial cells of the digestive system. Studies also indicate a role for Reg family members in tumor formation and indicate their potential for use as biomarkers of carcinogenesis. Mouse Reg2 is expressed in regenerating islets and normal exocrine pancreas. Reg2 also stimulates the growth of pancreatic beta cells. Mouse Reg2 belongs to the type II subclass of the Reg family and is the only subclass II Reg protein described.
